PROMPT

What is a Prompt?

An AI prompt acts as a way for individuals to interact with a complex language model broadly, allowing the model to generate the desired result. This prompt can be in the form of a question, text excerpt, code snippet, or illustration.

Within this PDF, you will discover different kinds of AI prompts across various fields. You can input these prompts into AI Chatbots such as ChatGPT, Perplexity, and others to achieve your specific results.

Let's Start

MARKETING

- Can you provide me with some ideas for blog posts about [topic of your choice]?

- Write a minute-long script for an advertisement about [product or service or company]

- Write a product description for my [product or service or company]

- Suggest inexpensive ways I can promote my [company] with/without using [Media channel]
